Data Management, Simplified.

## Atempo Live Backup - The Ultimate Data Protection Solution for Macs in the Enterprise

Atempo Live Backup delivers an enterprise-level data protection solution that automatically and continuously backs up data on Macs, while minimizing impact to the system's performance and network. Atempo Live Backup increases productivity for Mac users by allowing them to recover their own files. It also enables IT administrators to centrally manage policies for both Windows and Macs in their enterprises.

## Key Value Propositions of Atempo Live Backup

### Economical, High-Performance Solution with Heterogeneous Support

Although Macs are becoming prevalent in the enterprise, many of the traditional IT administrative tools remain insufficient. Moreover, IT organizations increasingly have mandates to support Mac users with limited number of staff and resources. Atempo Live Backup provides a low-cost and comprehensive data protection solution for both Macs and Windows systems in the enterprise.

### Reliable Continuous Data Protection Solution for Macs

Traditional scheduled backup solutions largely depend on end-users to connect to the corporate network at a specific time. Studies have also shown that most end-users have unpredictable backup habits. As such, companies can not rely on end-users to backup corporate data on their systems. Consequently, there is a growing demand for an automatic backup solution for Macs. Atempo Live Backup uses its CDP technology to offer a real-time data protection solution for Macs, regardless of the connection to the corporate network.

### Centralized Administration Using Your Existing IT Infrastructure

Today's challenging economic conditions require companies to maximize existing IT assets and maintain consistent data backup and management policies for all systems in their organizations. Atempo Live Backup allows IT administrators to expand support for Macs in their existing Windows infrastructure without requiring additional hardware.

### Low Storage Requirement and Minimal Impact to Network Bandwidth

As volumes of corporate data continue to grow exponentially, companies are facing problems to store and protect these data efficiently without significantly impacting their limited IT budgets. Furthermore, the data backup processes must not interfere with end-users' productivity. Using data deduplication and block-level backup, Atempo Live Backup dramatically reduces storage and network bandwidth requirements and increases end-users' productivity.

## Key Features and Benefits

Atempo Live Backup is a transparent solution dedicated to the protection of your Macs. Built on a Client-Server architecture, it continuously protects Mac users' data, regardless of connection to the corporate network. Atempo Live Backup features a user-friendly client wizard for Mac users to recover any files without assistance from IT administrators. By delivering maximum protection of the data on your company's Macs, Atempo Live Backup is proved to be the enterprise data protection product that will meet the needs of your enterprise.

### Transparent Protection

Atempo Live Backup automatically backs up data with no disruption of Mac users' work patterns or network performance. It acts transparently on all Macs, captures changes in real time, and sends them to the Atempo Live Backup Server. Data is continuously backed up even when Macs are disconnected and roaming, saving all changed data to its cache until the computer is connected to the network again.

### Efficient Storage

Within your enterprise, many Mac users may store the same version of a file multiple times. When you offer protection to a large number of Mac users, this data duplication is frequent and can make storage volumes explode. The Atempo Live Backup data de-duplication feature saves storage space by only transferring and storing redundant blocks once, which reduces bandwidth usage and significantly saves costs.

### Self-serve File Recovery

Self-serve restore capabilities for Mac users minimize the need for IT help. A user-friendly interface makes file recovery easy for users—minimizing the need for IT assistance, improving productivity, and lowering TCO. Users can easily restore recoverable files, including those that are deleted, and "empty trash" with the assistance of the Atempo Live Backup Recovery Assistant client wizard. Integration with the local user file system will also enable Mac users to recover previous versions of a file through the Finder functionality.

### Central Administration and Management

Administrators can enforce consistent backup policies across the WAN and control features available to both Mac and PC users. Atempo Live Backup makes it easy for administrators to deploy, manage, and enforce consistent backup policies across all enterprise clients. Whether you start with a small department, a group of remote offices, or a company-wide rollout, Atempo Live Backup lets you easily transfer client accounts and protected data across Atempo Live Backup servers, making this a flexible solution that easily scales with your business.

### Minimum System Requirements:

**Atempo Live Backup Client:**

- Macintosh® with a PowerPC or Intel® processor
- 1 GB RAM
- 100 MB of free disk space (500 MB recommended)
- Mac OS® X version 10.6.x (Snow Leopard) or 10.5.x (Leopard) or 10.4.11 (Tiger)
- Network connection (modem, WAN and wireless are supported)

**Atempo Live Backup Server:**

- 1-GHz (x86) or 1.4-GHz (x64) processor (2GHz or faster processor recommended)
- 512 MB RAM (2 GB recommended)
- 5 GB hard disk space plus adequate disk space for the client backup files
- Dynamic volumes or RAID recommended
- SCSI/RAID subsystem recommended
- Network card (100 Mbps or better recommended)
- Windows Server® 2003 Standard or Enterprise Edition SP2 or Windows Server 2008® Standard or Enterprise Edition (32- or 64-bit)
- IIS 6.0 for Windows Server® 2003 or IIS 7.0 for Windows Server® 2008 (32-bit support only)
- Microsoft® SQL Server® 2000 Standard or Enterprise Edition SP3a or Microsoft® SQL Server® 2005 Standard, Enterprise, Developer, or Workgroup Edition (32- or 64-bit)

## Atempo

### About Atempo

Atempo enables organizations to protect, manage, archive, and recover digital information simply and effectively, across any infrastructure, on any platform, over any period of time. Atempo provides a comprehensive portfolio of integrated software solutions, including backup and recovery of servers, continuous data protection of workstations and laptops, and long-term archiving of files and email messages. Atempo simplifies the management of data throughout its entire lifecycle by providing unprecedented visibility and control over data growth, infrastructure cost, and risk mitigation. Atempo serves thousands of customers around the world through a sales and support network of over 200 resellers and partners.
